Independent Auditor's Report **on the Annual Accounts**

(Translation from the original in Spanish. In the event of discrepancy, the Spanish-language version prevails.)

To the shareholders of Healthcare Activos Yield SOCIMI, S.A.

Opinion

We have audited the annual accounts of Healthcare Activos Yield SOCIMI, S.A. (the "Company"), which comprise the balance sheet at 31 December 2024, and the income statement, statement of changes in equity and statement of cash flows for the year then ended, and notes.

In our opinion, the accompanying annual accounts give a true and fair view, in all material respects, of the equity and financial position of the Company at 31 December 2024, and of its financial performance and its cash flows for the year then ended in accordance with the applicable financial reporting framework (specified in note 2 to the annual accounts) and, in particular, with the accounting principles and criteria set forth therein.

Basis for Opinion

We conducted our audit in accordance with prevailing legislation regulating the audit of accounts in Spain. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Annual Accounts* section of our report.

We are independent of the Company in accordance with the ethical requirements, including those regarding independence, that are relevant to our audit of the annual accounts pursuant to the legislation regulating the audit of accounts in Spain. We have not provided any non-audit services, nor have any situations or circumstances arisen which, under the aforementioned regulations, have affected the required independence such that this has been compromised.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Most Relevant Aspects of the Audit

The most relevant aspects of the audit are those that, in our professional judgement, have been considered as the most significant risks of material misstatement in the audit of the annual accounts of the current period. These risks were addressed in the context of our audit of the annual accounts as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these risks.

Recoverable amount of investments in Group companies (see notes 4.1. and 6)

At 31 December 2024 the Company holds investments in Group companies of Euros 431,945 thousand (which represent 98% of total assets at that date). The recoverable amount of investments in Group companies is considered a relevant aspect of the audit, insofar as these investments represent a very relevant percentage of total assets. The recoverable amount of the investment in Group companies is determined, for those companies in which there is objective evidence of impairment, by applying valuation techniques which often require the exercising of judgement by the Directors and the use of assumptions and estimates. Due to the uncertainty associated with the aforementioned estimates, this has been considered a relevant aspect of the audit.

Our audit procedures included assessing the design and implementation of the key controls relating to the valuation process, evaluating the existence of the evidence of impairment identified by the Company, as well as the methodology and assumptions used to estimate the recoverable amount, which take into account the unrealised gains from the real estate assets that are included in the appraisals made by independent experts. We also involved our valuation specialists to assess the reasonableness of the main assumptions used by the Company. We also assessed whether the disclosures in the annual accounts meet the requirements of the financial reporting framework applicable to the Company.

Other Information: Directors' Report

Other information solely comprises the 2024 directors' report, the preparation of which is the responsibility of the Company's Directors and which does not form an integral part of the annual accounts.

Our audit opinion on the annual accounts does not encompass the directors' report. Our responsibility for the directors' report, in accordance with the requirements of prevailing legislation regulating the audit of accounts, consists of assessing and reporting on the consistency of the directors' report with the annual accounts, based on knowledge of the entity obtained during the audit of the aforementioned annual accounts, and assessing and reporting on whether the content and presentation of the directors' report are in accordance with applicable legislation. If, based on the work we have performed, we conclude that there are material misstatements, we are required to report them.

Based on the work carried out, as described in the preceding paragraph, the information contained in the directors' report is consistent with that disclosed in the annual accounts for 2024 and the content and presentation of the report are in accordance with applicable legislation.

(Translation from the original in Spanish. In the event of discrepancy, the Spanish-language version prevails.)

Directors' Responsibility for the Annual Accounts

The Directors are responsible for the preparation of the accompanying annual accounts in such a way that they give a true and fair view of the equity, financial position and financial performance of the Company in accordance with the financial reporting framework applicable to the entity in Spain, and for such internal control as they determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Annual Accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with prevailing legislation regulating the audit of accounts in Spain will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

As part of an audit in accordance with prevailing legislation regulating the audit of accounts in Spain, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.

(Translation from the original in Spanish. In the event of discrepancy, the Spanish-language version prevails.)

- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual accounts, including the disclosures, and whether the annual accounts represent the underlying transactions and events in a manner that achieves a true and fair view.

We communicate with the Directors of the entity regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the significant risks communicated to the Directors of Healthcare Activos Yield SOCIMI, S.A., we determine those that were of most significance in the audit of the annual accounts of the current period and which are therefore the most significant risks.

We describe these risks in our auditor's report unless law or regulation precludes public disclosure about the matter.

Healthcare Activos Yield SOCIMI, S.A.

Notes to the Annual Accounts for the financial year concluding on December 31, 2024

1. Activity of the Company

Healthcare Activos Yield Socimi, S.A. was incorporated on February 1, 2019 under the corporate name of Roldania Investments, S.A. before the notary Fernando Fernández Medina. On July 26, 2019, the corporate domicile of the Company was relocated to Paseo de la Castellana, 45 6^a 28046, Madrid. Later, on September 18, 2019, the company was named Healthcare Activos Yield SOCIMI, S.A. On September 17, 2024, the corporate domicile of the Company was relocated to Calle Serrano, 21 6^a 28001, Madrid.

On September 13, 2019, the General Shareholders' Meeting of the company agreed on the adoption of the special tax regime of "SOCIMI", defined in Law 11/2009, of 26 October, which regulates Publicly-traded Investment Corporations in the Real Estate Market, with effect for the tax periods beginning 1 February 2019 (date of incorporation of the Company).

The Company and its subsidiary companies are part of the first leading platform in Spain for specialised investment in real estate assets at the service of the social/healthcare sector, including nursing homes, hospitals and clinics.

The Company's corporate purpose, pursuant to its by-laws, is as follows:

- > the acquisition and promotion of real estate of an urban nature for its lease, including the activity of renovation of buildings in the terms established in Law 37/1992, of 28 December, on Value-Added Tax;
- > holding shares in the capital of other publicly-traded real estate investment companies (SOCIMIs), or in other entities that do not reside in Spanish territory that have the same corporate purpose as them, and are subject to a regime similar to the one established for SOCIMIs as concerns the mandatory, legal or statutory policy for the distribution of profits.
- > holding stakes in the capital of other entities, whether or not they are residents in Spanish territory, who have as their main corporate purpose the acquisition of real estate of an urban nature for its lease, and that are subject to the same regime that is established for SOCIMIs as concerns the mandatory, legal or statutory policy for distribution of profits, and that meet the investment criteria required for such companies; and
- > holding shares or stakes in Collective Real Estate Investment Institutions regulated in Law 35/2003, of 4 November, on Collective Investment Institutions, or any rule replacing it in the future.

Along with the economic activity derived from the main corporate purpose, the Parent Company may conduct other additional activities, with any whose income totals, overall, less than 20% of the Company's total revenue in a given tax period, or those that may be considered complementary pursuant to the applicable law at any time.

The listed activities may also be totally or partially, conducted by the Parent Company, indirectly, through holdings in other companies of identical or similar purpose.

The tax regime of the Company and most of its subsidiaries is regulated by Law 11/2009, of 26 October, later modified by Law 16/2012, of 27 December, which regulates Publicly-traded Investment Corporations in the Real Estate Market (SOCIMI). Article 3 establishes the investment requirements for this type of Companies, which are :

1. The SOCIMI must have invested, at least, 80% of the value of the asset in real estate of an urban nature intended for the lease, in land for the promotion of real estate to be used for that purpose, provided that the promotion is initiated within three years following its acquisition, as well as in shares in the capital or equity of other entities that are referred to in Section 1, Article 2 of the aforementioned Law.

The value of the asset will be determined by the average of the individual quarterly balance sheets for the financial year. The SOCIMI may calculate this value to replace the book value with the market value of the elements that make up these balance sheets, which would be applied to all balance sheets for the financial year. For these purposes, and if applicable, the money or credit claims from the transfer of such real estate or shares that have been made in the same or prior financial year will not be calculated when, in the latter case, the reinvestment period referred to in Article 6 of the aforementioned Law has not passed.

This percentage will be calculated based on the average of the consolidated balance sheet in the event that the company is the parent company of a group according to the criteria established in Article 42 of the commercial code, regardless of residence and the obligation to formulate consolidated annual financial statements. Said group shall be made up exclusively of the SOCIMI and the rest of the entities referred to in section 1 of Article 2 of said Law.

2. Likewise, at least 80% of the income of the tax period corresponding to each financial year, excluding those derived from the transfer of the shares and the real estate assets both subject to the fulfilment of their main corporate purpose, once the maintenance period referred to in the following section has elapsed, must come from the leases of real estate and from dividends or interests in the profits from said shares.

This percentage will be calculated on the consolidated result in the event that the company is the parent company of a group according to the criteria established in Article 42 of the Commercial Code, regardless of residence and the obligation to formulate consolidated annual financial statements. Said group shall be made up exclusively of the SOCIMI and the rest of the entities referred to in section 1 of Article 2 of said Law.

3. The real estate that makes up the assets of the company must remain leased for at least three years. For the purposes of the calculation, the time that the properties have been offered under lease will be added, with a maximum of one year.

The term shall be calculated:

- a. In the case of real estate that appears in the equity of the Company before the time of joining the regime, from the start date of the first tax period in which the special tax regime established in said Law is applied, provided that on that date the property was leased or offered under lease. Otherwise, the provisions of the following letter shall apply.
- b. In the case of real estate promoted or acquired later by the Company, from the date on which they were leased or offered in lease for the first time.
- c. In the case of shares or equity interests in the capital of entities referred to in section 1 of article 2 of said Law, they must remain in the assets of the Company for at least three years from their acquisition or, where appropriate, from the beginning of the first tax period in which the special tax regime established in said Law is applied.

In addition, Law 11/2009 establishes the following requirements in Articles 4 and 5:

1. The shares of the SOCIMI must be registered and be admitted for negotiation in a regulated market or in a multilateral Spanish trading system or in that of any other Member State of the European Union or the European Economic Area, or in a regulated market of any country or territory with which there is effective exchange of tax information, uninterrupted throughout the tax period.
2. The SOCIMI will have a minimum share capital of 5 million euros. There may be only one class of shares. When the Company has opted for the special tax regime established in said Law, it must include in the company's name the indication "Sociedad Cotizada de Inversión en el Mercado Inmobiliario, Sociedad Anónima", or its abbreviation, "SOCIMI, S.A.".
3. In addition, as described in Article 6 of Law 11/2009, of 26 October, which regulates Publicly-traded Investment Corporations in the Real Estate Market, the SOCIMI and entities residing in the Spanish territory in which they participate that have opted for the application of the special tax regime established by said Law, are required to distribute dividends to their shareholders, once the corresponding commercial obligations have been fulfilled, the profit obtained in the financial year, its distribution must be agreed upon within six months following the conclusion of each financial year, in the following form: (i) 100% of the profits from dividends or interests in profits distributed by the entities subject to said regime; (ii) 50% of profits arising from the transfer of real estate and shares or equity units, made after the deadlines established in the investment requirements have elapsed, with the rest of said profits being reinvested within the three years following said transfer, and failing that, must be distributed in full; and (iii) at least 80% of the rest of the profits obtained.

As established in Note 10, during the 2023 financial year, the Parent Company distributed interim dividends of the results of the 2023 financial year. In the 2024 financial year, the company distributed interim dividends for the profits of the 2024 financial year.

As established in the First Transitory Provision of Law 11/2009, of 26 October, which regulates Publicly-traded Investment Corporations in the Real Estate Market, it may be decided to apply the special tax regime in the terms established in article 8 of said Law, even when the requirements therein are not met, provided that such requirements are met within two years following the date of the option to apply said regime.

In this regard, as of December 31, 2024 and 2023, of the requirements established by Law 11/2009, of 26 October, which regulates the Publicly-traded Investment Corporations in the Market, the Company complies with all the conditions mentioned therein.

The Board of Directors of the Company monitors compliance with the requirements established in said Law, with the objective of maintaining the aforesaid tax regime, estimating that said requirements will be fulfilled in the terms and deadlines set, and recognising the corporate income tax for the financial year in that sense.

The Company is the head of a group of subsidiary entities, and in accordance with the current legislation, is required to separately prepare consolidated annual financial statements. The profit and consolidated net equity of the Group totalled 8,976 and 468,192 thousand euros, respectively (12,841 and 464,088 thousand euros, respectively, in the 2023 financial year).

2. Basis for presentation of annual financial statements

2.1.TRUE AND FAIR VIEW

The annual financial statements have been prepared from the Company's accounting records, and are presented in accordance with the General Accounting Plan, approved by Royal Decree 1514/2007, of 16 November, which approves the General Accounting Plan and the mandatory accounting legal provisions, in order to show a fair representation of the equity, the financial position and the results of the company during the corresponding financial year.

The Company's annual financial statements for financial year 2024 have been formulated by the Company's Board of Directors on March 10, 2025, and will be submitted for approval by the General Meeting of Shareholders, it being estimated that they will be approved without any modification.

2.2 ACCOUNTING PRINCIPLES NOT APPLIED

The accounting principles and valuation rules used by the Company to prepare the annual accounts of the financial year are the same ones applied for the Financial Statements for the financial year ending at 31 December 2023.

2.3 FUNCTIONAL CURRENCY

The figures obtained in the annual financial statements are expressed in thousands of euros.

2.4. CRITICAL ASSESSMENT ASPECTS AND ESTIMATION OF UNCERTAINTIES

There are no relevant data on the estimation of uncertainty at the closing date of financial year, as there has not been associated any significant risk that could involve significant changes in the value of assets or liabilities in the following financial year.

The management estimates that there are no risks of significant uncertainties related to events or conditions that may give rise to significant doubts about the possibility that the company will continue to operate normally.

2.5. COMPARISON OF THE INFORMATION

The annual financial statements are presented for comparative purposes, with each of the items of the Balance Sheet and the Profit and Loss Account, the Consolidated Statement of Changes in Net Equity, the Consolidated Cash Flow Statement and the Consolidated Annual Report, in addition to the figures of the 2024 financial year, those corresponding to the previous financial year of 2023, which were approved by the General Meeting of Shareholders on April 25, 2024.

2.6 FINANCIAL RISK MANAGEMENT

The Company efficiently manages its financial risks with the aim of having an adequate financial structure that allows it to maintain high levels of liquidity, minimise borrowing costs, reduce volatility due to changes in capital and ensure compliance with its business plans. The Company's management of financial risk is centralized in its Financial Management, which has established the necessary mechanisms to control exposure to the main risks that could have an impact on the Company's operations, described in the following paragraphs:

Market risk: Market risk is the risk that the fair value or future cash flows of a financial instrument fluctuate due to changes in market prices. The Company's market risks arise from open positions in assets and liabilities that accrue interests, to the extent they are exposed to general and specific movements of the market. The administration sets limits to interest rate risk exposure that could be acceptable, which are regularly monitored (see details below). However, the use of this focus does not prevent losses outside these limits in case of more significant market movements.

Interest rate risk: The Company's interest rate risk arises from long-term borrowings. External resources issued at variable rates expose the Company to cash flow interest rate risk.

Liquidity risk: Liquidity management is carried out by the Group's Finance Department, which makes the necessary cash forecasts and follows up on the annual budget and liquidity needs to guarantee compliance with its financial obligations. The Company is not significantly exposed to liquidity risk due to the maintenance of sufficient cash and the availability of financing to deal with the cash outflows necessary in its usual operations.

Counterparty risk: the Company mitigates this risk by using top-tier financial institutions to arrange its financial operations.

Credit risk: The Company has policies to ensure that sales are made to customers with an adequate credit history. The value correction for customer insolvency involves the review of individual balances based on customer credit quality, current market trends and historical analysis of aggregate insolvencies. At 31 December 2024 and 2023, the Company did not present any significant recognised impairments, as there were not any mature balances linked to credit risk.

3. Distribution of results

3.1 PROPOSED APPLICATION OF PROFIT

The Board of Directors of the Company will propose to the General Meeting of Shareholders the application of the results of financial year 2024 detailed below:

Thousands of euros	Basis of distribution	Distribution

4. Recording and valuation rules

The valuation standards used by the Company in the preparation of its consolidated annual financial statements for the year ended 31 December 2024, in accordance with those established by the General Accounting Plan, are the following:

4.1 FINANCIAL INSTRUMENTS: ASSETS

Initial recognition

Financial assets are recognised in the balance sheet when their acquisition is carried out and are initially recorded at fair value, including operating costs in general.

The financial assets held by the Company are classified as:

Financial assets held for trading

Assets whose acquisition originates with the purpose of selling them in the short term. It is initially valued at fair value and subsequently at its amortized cost.

Investments in group and associated companies, and multigroup

Group companies are considered those over which the Company, directly or indirectly, through subsidiaries, exercises control in the terms laid down in Art. 42 of the Commercial Code, or when companies are controlled by any means by one or several natural or legal persons that act jointly or are under a single management by agreements or statutory clauses.

Associated companies are considered those over which the Company, directly or indirectly, through subsidiaries, exercises significant influence. Significant influence is the power to intervene in the decisions of financial and operating policy of a company, without this implying the existence of control or joint control over said company. Existence of significant influence is assessed considering for these

purposes the potential voting rights that can be exercised or converted at the end of the financial year, and also considering the potential voting rights held by the Company or the other company.

Multigroup companies are considered those managed jointly by the Company or one or some of the group companies, including entities or dominant natural persons, and one or several third parties from outside the group.

Investments in group associated and multigroup companies, are initially recognised at cost, which is equivalent to the fair value of the consideration delivered, including, for investments in associated and multigroup companies, the transaction costs incurred. These are later assessed at cost, minus the accrued amount of valuation adjustments for impairment.

Loans and collection items

These correspond to credits (commercial or non-commercial) originated by the Company in exchange for supplying cash, goods or services directly and whose collections are of a determined or determinable amount and that are not traded in an active market. They are subsequently valued at their amortized cost by recognising the interest accrued based on their effective interest rate in the income statement.

The Company applies impairment criteria to those customers covered by an insurance entity, to the extent that the customer debts exceed 180 days from the expiration date for the amount of the uninsured part, and to those customers not insured when they exceed 180 days from the expiration date.

Cash and cash equivalents

Under this heading of the attached balance sheet, cash is recorded in cash and banks, sight deposits and other highly liquid short-term investments that are quickly cash-realizable and have no risk of changes in value.

Investments held until maturity

Investments held until maturity are securities representing debt with a fixed maturity date, fixed or determinable collections, which are traded in an active market and which the Company has the effective intention and ability to hold until maturity, other than those classified in other categories. The valuation criteria applicable to financial instruments classified in this category are those applicable to loans and receivables.

Disposal of financial assets

The Company derecognises a financial asset, or part thereof, when the contractual rights to the cash flows of the financial asset expire or are assigned, it being necessary to substantially transfer the risks and benefits inherent in its ownership.

The disposal of a financial asset in its entirety implies the recognition of results for the difference between its book value and the sum of the consideration received, net of transaction expenses, including the assets obtained or liabilities assumed and any deferred profit or loss on consolidated recognised income and expenses in the shareholders' equity.

Impairment of the value of financial assets

A financial asset or group of financial assets is impaired and an impairment loss has occurred, if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset and that event or events causing the loss to have an impact on the estimated future cash flows of the financial asset or group of assets, which can be reliably estimated.

The Company follows the criteria of recording the timely valuation corrections for impairment of loans and receivables and debt instruments, when there has been a reduction or delay in estimated future cash flows, caused by the debtor's insolvency.

Likewise, in the case of equity instruments, there is an impairment in value when there is a lack of recoverability of the book value of the asset due to a prolonged or significant decrease in its fair value.

4.2 FINANCIAL INSTRUMENTS: LIABILITIES

Financial liabilities, including trade creditors and other accounts payable, that are not classified as held for trading or as financial liabilities at fair value with changes in the profit and loss account, are initially recognised at their fair value, minus, where appropriate, transaction costs that are directly attributable to the issuance thereof. After initial recognition, liabilities classified under this category are valued at amortized cost using the effective interest rate method.

The financial liabilities, for valuation purposes, are classified into the following categories:

- **Debits and items payable:** The debits for commercial transactions, which have originated in the purchase of goods and services for traffic transactions, and the debits for non-commercial transactions, which, not being derivative instruments, have no commercial origin, have been included. These financial liabilities have been initially valued at their fair value, and subsequently, at their amortized cost.
- **Financial liabilities held for trading:** Includes liabilities issued mainly for the purpose of repurchase in the short term, liabilities that are part of a portfolio of financial instruments identified and managed jointly, when there is evidence of recent actions to obtain short-term profits, and finally derivative financial instruments that are not contracted as financial guarantees, nor have been designated as hedging instruments. These liabilities have been valued at their fair value both initially and subsequently with allocation to the profit and loss account.
- **Bank loans and overdrafts that accrue interest** are accounted for at the amount received, minus direct issue costs. Financial expenses, including premiums payable in settlement or reimbursement and direct issuance costs, are accounted for at the accrual criteria in the profit and loss account using the effective interest method and are added to the instrument's book value to the extent that they are not settled in the period in which they occur.

Disposal and modification of financial liabilities

The Company derecognises a financial liability or a portion thereof when it has complied with the obligation contained in the liability or is legally exempted from the main liability contained in the liability either by virtue of a judicial process or by the creditor.

The difference between the book value of the financial liability or the part thereof that has been derecognised and the consideration paid – including attributable transaction costs and in which any asset assigned other than the cash or liability assumed will also be recorded – is recognised in the profit and loss account for the year in which it took place.

4.3 CASH AND CASH EQUIVALENTS

Cash and other cash equivalents include cash at hand and current bank deposits in financial institutions. Other short-term, highly liquid investments are also included in this concept, as long as they are easily convertible into certain amounts of cash, and there is insignificant risk of any value change. For that purpose, investments maturing in less than three months from the date of acquisition are included. The cash flow statement includes as cash and other equivalent liquid assets bank overdrafts repayable on demand and that form part of the company's cash management. Bank overdrafts are recognised in the consolidated balance sheet as financial liabilities for debts with credit entities.

4.4 TAX ON PROFITS

The tax expense or income against profits represents the current as well as deferred taxes.

The Company does not pay tax under a consolidated tax regime, by doing so individually for each of the companies.

The differences existing between the accounting result and the tax result have been considered, this being understood as the tax base of the Corporate Tax. These differences are due to the unequal definition of income and expenses in the economic and tax spheres and to the different time criteria for income and expenses in the aforementioned spheres.

The differences are classified into:

- Permanent differences, produced between the tax base of said tax and the accounting result before taxes for the financial year, which do not reverse in subsequent periods, excluding the offset losses.
- Temporary differences are those derived from the different valuation – accounting and fiscal – attributed to the assets, liabilities and certain instruments of own equity of the company, to the extent that they have an impact on the future tax burden.

As described in Note 1, the company is under the SOCIMI (Sociedades Anónimas Cotizadas de Inversión en el Mercado Inmobiliario [Public Limited Companies with Investment in the Real Estate Market]) regime regulated by Law 11/2009, of 26 October, regulating Public Limited Companies with Investment in the Real Estate Market. In this regard, in compliance with certain requirements established by said Law, the company pays a rate of 0% on Corporate Tax. Article 10 of that Law also regulates the special tax regime of partners, and particularly dividends distributed from profits or reserves on which the special tax regime established in that Law has been applied, as well as income arising from the transfer or reimbursement of capital stock of the companies opting to apply that regime.

The Board of Directors of the Company monitors compliance with the requirements established in said Law, with the objective of maintaining the aforesaid tax regime, estimating that said requirements will be fulfilled in the terms and deadlines set, and recognising the corporate income tax for the financial year in that sense.

Deferred tax assets

According to the principle of prudence, deferred tax assets will only be recognised to the extent that it is probable that the Company will have future tax profits that allow the application of these assets. Whenever the above condition is met, a deferred tax asset will be recognised in the following cases:

- a) For deductible temporary differences;
- b) For the right to offset tax losses in subsequent periods;

- c) For deductions and other unused tax advantages not yet applied for tax purposes.

The subsidiaries of the Company, in accordance with current accounting regulations, proceed to activate the tax losses estimating that they will be able to recover all those accounted for according to future financial projections that support such activation.

Deferred tax liabilities

A deferred tax liability is recognised for all taxable temporary differences, unless they arise from:

- a) The initial recognition of a goodwill. However, deferred tax liabilities related to a goodwill will be recorded provided they have not arisen from their initial recognition.
- b) The initial recognition of an asset or liability in a transaction that is not a business combination and also did not affect the book result or the tax base.

Current tax assets and liabilities

The current tax is the amount that the company satisfies as a result of the tax settlements of the tax or taxes on the profit relating to a financial year. The deductions and other tax advantages in the tax quota, excluding withholdings and payments on account, as well as the tax losses to be offset from previous fiscal years and effectively applied therein, will result in a lower amount of current tax. However, those deductions and other tax advantages in the tax quota that have an economic nature similar to grants are recorded in accordance with the provisions of the standard relating to grants, donations and legacies received.

Valuation of current and deferred tax assets and liabilities

Current tax assets and liabilities are valued at the amounts expected to be paid or recovered by the tax authorities, in accordance with current regulations.

Deferred tax assets and liabilities shall be valued according to the types of tax expected at the time of their reversal, according to current regulations, and according to the manner in which the asset or liability is reasonably expected to be recovered or paid.

4.5 INCOME AND EXPENSES

The income and expenses are allocated based on the accrual criterion regardless of the moment in which the monetary or financial current derived from them occurs.

However, the Company only records the profits realised at the year-end closing, while foreseeable risks and losses, even if they are eventual, are accounted for as soon as they are known.

Income from contracts with customers are recognised depending on the fulfilment of performance obligations with customers. However, the Company only records the profits realised at the year-end closing, while foreseeable risks and losses, even if they are eventual, are accounted for as soon as they are known.

Income from the sale of goods or services is recognised at the fair value of the compensation received or to be received as a result thereof. Cash discounts, by volume or other types of discounts, as well as interest incorporated into the nominal value of the credits, are recorded as a reduction thereof.

The Company obtains its income mainly from the interests of loans granted to its subsidiaries and the dividends received from them. The loans held by the company with its subsidiaries guarantee the development of the financing operations for their assets, from which income is obtained derived from the interests they generate. These revenues are presented as a part of the Net Turnover.

4.6 PROVISIONS AND CONTINGENCIES

Provisions

The liabilities covering obligations present at the date of the balance sheets arising as a result of past events from which financial damages may arise from probable materialisation for the Company are recognised as provisions, the amount and time of cancellation of which are undetermined.

No amount referring to this item appears in the Balance Sheet.

Contingent liabilities

Possible obligations arising as a result of past events, the materialisation of which is conditioned on the occurrence, or not, of one or more future events independent of the will of the Company.

The contingent liabilities are not recognised in the annual financial statements, but rather they report on them, in accordance with the requirements of the accounting regulations.

As of the balance sheet date, there are no significant contingencies as a result of past events that may result in financial losses for the Company that are not provisioned.

4.7 CRITERIA USED IN TRANSACTIONS BETWEEN RELATED PARTIES

The transactions between companies of the same group, regardless of the degree of connection between the companies pertaining to the group, will be accounted for in accordance with the general rules.

The items that are the object of the transaction are initially accounted for at fair value.

The Company carries out all its transactions with related parties to market values. Additionally, the transfer prices are adequately supported, so the Company's directors consider that there are no significant risks for this aspect from which liabilities of consideration may arise in the future.

4.8 CURRENT AND NON-CURRENT ITEMS

Current assets are considered to be those related to the normal operating cycle, which in general is considered to be one year, as well as other assets whose maturity, disposal or realisation is expected to occur in the short term from the closing date of the financial year. There are financial assets held for trading that are held under the non-current assets, despite a short-term return. Assets that do not meet these requirements are classified as non-current.

Similarly, current liabilities are those related to the normal operating cycle, financial liabilities held for trading, with the exception of financial derivatives whose settlement term is greater than the year and in general all obligations whose maturity or extinction will occur in the short term. Otherwise, they are classified as non-current.

4.9 MERGER AND SPIN-OFF OPERATIONS AND NON-MONETARY CONTRIBUTIONS

In merger operations, business spin-off and non-monetary contributions between companies of the group in which the parent company of the same or the parent company of a subgroup and its dependents intervene, directly or indirectly, the assets that are contributed are valued for the amount that would correspond, once the operation is performed, in the consolidated annual financial statements of the group or subgroup in accordance with the Standards for the Formulation of the Consolidated Annual Financial Statements established in RD 1159/2010, of 17 September 2010. However, in the event that consolidated annual financial statements are not formulated, under any of the exemptions provided for in the accounting regulations in force, the existing accounting values are considered before the operation is carried out in the individual annual financial statements of the contributing company

In the event that a difference between the individual and the consolidated accounting values is revealed, said difference would be attributed against a reserve item in the beneficiary company.

The date of accounting effects for all merger and spinoff operations between companies of the group is the date of commencement of the period in which the operation is approved, provided that it is subsequent to the time when the companies were incorporated into the group; otherwise, the date of accounting effects would be that of incorporation into the group. In the case of non-monetary contributions of assets and liabilities that constitute a business, the date of accounting effects is considered to be the date of public increase of the capital increase agreement provided that the date of registration in the Commercial Registry is prior to the date on which the annual financial statements for the year in which such contributions are made.

Likewise, and in accordance with the provisions of RD 1159/2010 of 17 September, in merger and spin-off operations between companies forming part of the same group prior to the start of the immediately preceding period, no information is included on the accounting effects of the merger or spin-off in the comparative information.

DEBT WITH FINANCIAL INSTITUTIONS

The Company breakdown of amounts payable to credit institutions is as follows:

By loans

On March 31, 2022, the company Healthcare Activos Europe, S.A. formalized a revolving credit facility in the amount of 40 million euros for the purpose of financing Group developments, with the financial institutions Crédit Agricole Corporate and Investment Bank, (Spanish branch) and BNP Paribas, S.A. (Spanish branch), each of which holds a 50% share. On April 8, 2022, this financing was transferred to the Company through a purchase-sale contract for shares, and the transfer of rights. They totalled 40 million euros (33.7 million euros at December 31, 2023) at December 31, 2024. The due date is set for March 2027, by way of a single payment estimated to be made on the appropriate due date.

The formalisation costs for the loan totaled 400 thousand euros, and are shown as subtracted from the balance under the heading "Amounts payable to credit institutions". They totalled 185 thousand euros (265 thousand euros at December 31, 2023) at December 31, 2024. The financial expense related to the allocation of such formalisation expenses accrued during financial years 2024 and 2023 amounts to 80 thousand of euros.

At 31 December 2023, this credit facility was drawn in 33,700 thousand euros. The due date was set for March, 2027.

The formalisation costs for the loan totaled 404 thousand euros, and are shown as subtracted from the balance under the heading "Amounts payable to credit institutions". The financial expense related to the allocation of such formalisation expenses accrued during financial year 2023 amounted to 80 thousand euros.

The loan accrues an interest rate referenced to the Euribor plus a market margin. The interest and commissions related to said loan accrued during financial year 2024 amount to 2,380 thousand euros (2,005 thousand euros during financial year 2023); of which as at 31 December 2024, 93 thousand euros (102 thousand euros as at the closing of financial year 2022) have been accrued and not paid.

The loan agreement establishes various agreements and covenants, including the fulfilment of certain financial ratios that the Board of Directors estimates are fulfilled without incident at the end of financial year 2024. They are expected to be fulfilled without incident in 2025.

The loan agreement establishes various agreements and covenants, including the fulfillment of certain financial ratios that the Board of Directors estimates are fulfilled without incident at the end of financial years 2024 and 2025.

By credit facilities

On 21 April 2024 the Company renewed the extension of a credit facility with CaixaBank for the amount of 15,000 thousand euros (the credit facility was renewed for 15,000 thousand euros in 2023), at market interest. The due date of the credit facility is April 30, 2025. At the end of the 2024 financial year, it was undrawn. Therefore, entirety of this credit facility is available.

The interests accrued by this credit facility over the 2024 financial year totalled 225 thousand euros (123 thousand euros in 2023); of which 60 thousand euros had accrued, and not been paid, at 31 December 2024 (28 thousand euros in 2023).

On 25 April 2024 the Company renewed an indefinite credit facility that it had formalised on 25 April 2022 with Bankinter for the amount of 5,000 million euros, at market interest. At the end of the 2024 financial year, it was undrawn. Therefore, the entirety of this credit facility is available. The interests accrued by this credit facility over the 2024 financial year totalled 68 thousand euros (93 thousand euros in 2023); of which 24 thousand euros had accrued, and not been paid, at 31 December 2024 (1 thousand euros in 2023).

On 12 July 2024 the Company renewed a credit facility with Banco de Sabadell, with due date 12 July 2025, for the amount of 5,000 thousand euros, at market interest. At the end of financial year 2024, the drawn balance was 4,049 thousand euros. The interests accrued by the credit facility over the 2024 financial year totalled 156 thousand euros (24 thousand euros in 2023); of which 0 thousand euros had accrued, and not been paid, at 31 December 2024 (0 thousand euros in 2023).

On December 17, 2019, the Board of Directors of the Company agreed to the acceptance from January 1, 2020 of the group of entities whose parent is the Company, opting for the application of the Special Regime of the Value Added Tax of the Group of Entities, provided for in Chapter IX of Heading IX of Law 37/1992, of 28 December. As of December 31, 2022 and December 31, 2021 subsidiaries Healthcare Activos Financing, S.L.U., Healthcare Activos Inmobiliarios 13, S.L.U. and Healthcare Activos Yield Growth, S.L.U. (the latter two were absorbed in 2022 by the company Healthcare Activos Financing, S.L.U.) belonged to this group.

On November 30, 2022, the Company agreed to include in the group the subsidiaries Healthcare Activos Inmobiliarios 14, S.L.U. Healthcare Activos Inmobiliarios 15, S.L.U., Healthcare Activos Inmobiliarios 20, S.L.U., Healthcare Activos Inmobiliarios 21, S.L.U., Healthcare Activos Inmobiliarios 22, S.L.U., Healthcare Activos Inmobiliarios 23, S.L.U., Healthcare Activos Inmobiliarios 24, S.L.U., Healthcare Activos Inmobiliarios 25, S.L.U., Healthcare Activos Inmobiliarios 29, S.L.U., Healthcare Activos Inmobiliarios 30, S.L.U., Healthcare Activos Inmobiliarios 31, S.L.U., Healthcare Activos Inmobiliarios 32, S.L.U., Healthcare Activos Inmobiliarios 33, S.L.U. and Healthcare Activos Inmobiliarios 34, S.L.U.; and that will be applicable for the financial years beginning as of January 1, 2023.

On March 1, 2023, the Parent company agreed to include in the group the subsidiaries Healthcare Activos Inmobiliarios 35, S.L.U., and Healthcare Activos Inmobiliarios 36, S.L.U.
No additional companies were added to this VAT Group during the 2024 financial year.

TAX ON PROFITS

As stated in Note 1, on September 13, 2019, the Company notified the State Tax Administration Agency that they were applying the special SOCIMI (REIT) tax regime. The application of this regime has effects for the entire tax period of 2024 and 2023.

At December 31, 2024 and 2023, the Group does not keep any amount recorded for any type of deferred assets and liabilities (including negative tax bases) or deductions related to corporate income tax.

11.3 PERIODS NOT YET VERIFIED BY THE TAX AUTHORITIES

According to current legal provisions, tax assessments cannot be considered definitive until they have been inspected by the tax authorities or until the statute of limitations has elapsed.

In general, for the main applicable taxes, the Company has pending inspection by the tax authorities for all fiscal years since its incorporation. Due to the different interpretations of the applicable fiscal regulations, there could be contingent liabilities, which are not susceptible to objective quantification. However, Management considers that the materialisation of these would be unlikely and in any case defensible, and that they would not reach significant amounts in relation to the annual financial statements and it has not been considered necessary to provide any extra provision for this concept.

12. Income and expenses

12.1 NET REVENUE AND OTHER OPERATING INCOME

The heading "Net revenue" corresponds to the Dividends received by the company from its subsidiaries, in addition to the interests related with loans that it holds with them (see Note 14).

The heading Other operating income corresponds to the management contract existing between the Company and its subsidiaries, and expenses recorded under the heading "Other operating expenses" and that the Company has re-invoiced to subsidiaries (see Note 14).

12.2 OTHER OPERATING EXPENSES

The details of the main items included in this heading are as follows:

Thousands of euros	2024	2023
Independent professional services	353	1,130
Insurance premiums	72	198
Bank services	4	5
Other Expenditures	238	1
Other taxes	-	1
Total	667	1,335

The heading Services from independent professionals includes management fees invoiced by the managing company of the Group for an amount of 61 thousand euros, in addition to payment of personnel cost assumed by the managing company for an amount of 61 thousand euros under the management fee agreement formalised between the management company and the Company.

In the 2024 financial year, insurance costs totalled 344 thousand euros (198 thousand euros in the 2023 financial year), of which 272 thousand euros (106 thousand in the 2023 financial year) were reinviced by the Company to some of the subsidiaries (see Note 14).

13. Information on the average period of payment to suppliers during financial year. Third additional provision. Duty of information of Law 15/2010, of 5 July

We provide hereinunder the information required by the Third Additional Provision of Law 15/2010, of 5 July (amended by Second Final Provision of Law 31/2014, of 3 December), prepared as per the Spanish Accounting and Audit Institute (ICAC) Resolution of 29 January 2016, on the information to include in the Notes to the Annual Accounts regarding the average supplier payment term in business operations.

Days	2024	2023
------	------	------

Average supplier payment period	13	7
Ratio of transactions paid	13	7
Ratio of transactions pending payment	0	1
<hr/>		
Thousands of euros	2024	2023
Total payments made	554	2,251
Total outstanding payments	0	2

Invoices totalling 717 thousand euros have been paid (standing for 100% of the total payments to suppliers) in a period shorter than the maximum set in the regulations on payment default.

Thousands of euros	2024	2023
Monetary volume paid	554	1,306
% over the total payments to suppliers	89%	99.90%
Number of invoices paid	51	223
% over the number of invoices paid to suppliers	87.9%	99%

Pursuant to the ICAC Resolution, the calculation of the Average period of payment to suppliers is based on business operations linked to the delivery of goods or services, accrued since the entry into force of Law 31/2014, of 3 of December.

Suppliers are considered, for the exclusive purposes of providing the information stipulated in this Resolution, to be those trade creditors for debts with suppliers of goods or services, included in the item "Trade creditors and other payables" of the current liabilities on the attached balance sheet.

"Average period of payment to suppliers" is considered to the period that transpires from the delivery of the goods or services by the supplier and material payment of the operation.

As of the publication of the aforementioned Law, and up to the present, the maximum legal term applicable to the Company pursuant to Law 11/2013 of 26 July is 30 days (unless certain conditions established in the law are met, which would allow the extension of the payment period to 60 days).

14. Transactions and balances with related parties

14.1 TRANSACTIONS WITH GROUP, ASSOCIATED AND RELATED PARTIES

The breakdown of transactions that have taken place in the 2024 and 2023 financial years is shown in Annex II.

Directors' report

ECONOMIC EVOLUTION OF THE BUSINESS

Healthcare Activos Yield SOCIMI, S.A. is the head company of a group making up leading platform specialising in real estate assets in the social/healthcare and dependence sector in Iberia, with a portfolio of leased assets carefully selected under long-term contracts with top-tier European operators.

On December 23, 2021, the Company signed an agreement with a consortium of global institutional investors to invest in the platform, and support its future long-term growth. Within the same framework, an agreement was signed for the refinancing of the Group's debt, of which the Company is the head, through the cancellation of its outstanding debt, and the signing of a new loan agreement with BNP Paribas and Credit Agricole. On March 31, 2022 the conditions precedent established in these agreements were met. Consequently, the institutional investors REI Spain, B.V., took shares in the Company's capital. Durham County Council Pension Fund (Durham), Tfl Trustee Company Limited, trustee of Tfl Pension Fund (Transport for London), CBRE European Venture Fund (CBRE EVF) and One Hundred and Twenty Investment Company LLC (Abu Dhabi Sovereign Wealth Fund).

Concurrently, the Company acquired a portfolio of 14 buildings located mainly on the Iberian peninsula, owned by the Spanish company Healthcare Activos Investment S.A. and the Portuguese company HAACP Lda., with a total valuation of approximately 203 million euros.

The operation described made it possible for the Company and its subsidiaries to continue with the international expansion plan, having situated the market value of the investments managed by the Group of which the Company is head at as much as 867 million euros at December 31, 2024, and with a presence in Spain, Portugal and Belgium.

During the 2024 financial year, the Company reached a turnover amount of 14,432 thousand euros, with the turnover in the 2022 financial year amounting to 9,512 thousand euros. The 2024 and 2023 financial year turnover was comprised of the management services provided to subsidiaries, interests from loans granted to subsidiaries and income received by the Company as dividends received from its subsidiaries.

At the end of financial years 2024 and 2023, the Group, of which the Company is the head, has a total of 65 assets (63 assets at the end of financial year 2023) with a capacity of more than 7,565 beds, carefully selected in locations with fundamental supply-demand solids. All assets are leased to reputable operators under long-term contracts.

On October 1, 2020, the shares of the Company were technically listed in the "Euronext Access" stock market in Paris.

The social/healthcare and dependency sector has proven to be an essential infrastructure in a society marked by progressive ageing of the population at the domestic and EU levels as well as higher life expectancies. This reality is driving increased demand for residential facilities for elders, specialized care centers and social/health care services. The shortage of infrastructures adapted to the needs of an aging population is becoming a critical challenge. The Group is committed to the development of modern, efficient facilities that guarantee an optimal environment for the long-term care of elderly individuals and chronic patients.

In this scenario, the Group's foundations are worth highlighting: excellent carefully selected locations, leases to first-class social/health care operators with high rent coverage and triple net long-term rental contracts guaranteed by the Parent Company, with fixed income and indexed to the CP, or another price updating index applicable in the country where the asset is located. The solidity of the Group's results and treasury projections are noteworthy.

Also noteworthy is the Group's commitment to the ESG strategy, which in 2023 has meant the group's debt being rated as Social by the Moody's Agency.

The company has long-term commitments to support European healthcare operators in their expansion plans, cooperating with them through real estate infrastructure. Furthermore, the Company collaborates closely with the different operators of the healthcare sector contributing to the development of projects, measures and sector regulatory framework to achieve the best treatment and care of people, thus generating sustainable and long-term value for all interest groups.

INVESTMENTS

As of the end of financial year 2024, the subsidiaries have invested 76 million euros in the assets valued at the end of the 2024 financial year at 867 million euros, and plans to increase its investments in the short term in order to expand its assets portfolio in the healthcare sector during the 2025 financial year.

As of the end of financial year 2023, the subsidiaries have invested 73 million euros in the assets valued at the end of the 2023 financial year at 794 million euros, and plans to increase its investments in the short term in order to expand its assets portfolio in the healthcare sector during the 2024 financial year.
